About the project:

The main goal of the project TEOTL is to understand what was behind one of the basic religious categories of pre-Hispanic Nahua, referred to in the Nahuatl language by the term *teotl*. In order to comprehensively explore this issue, the project focuses on examining the following four research areas: 1) the so-called pantheon of Aztec gods; 2) the relationship between the category of *teotl* and other important religious categories (e.g., *tonalli*, *nahualli*, *ixiptla*, and others); 3) a philological analysis of the term *teotl* in collocations, relationships and discourse; 4) the use of the term *teotl* in colonial Christian Nahuatl discourse. Using a heterogeneous collection of textual and iconographic data, the project TEOTL will employ a novel combination of research methods at the intersection of traditional (ethnohistory, religious studies, art history, philology, linguistics) and digital humanities (network analysis). This hitherto unexplored research path will lead to a reconceptualization of our approach to the Nahua concept of the sacred and to its decolonization.
